## Product Change Announcement

Xorcom Ltd. announces the following changes in the Asterisk-based appliances hardware:

Product Name	Hardware Revision Number	Changes	From Serial Number
XE3000, TS3000	3.0	<ul style="list-style-type: none"><li>An Intel S1200KP motherboard has replaced the Intel DG41VW motherboard</li><li>An Intel i3 2120 CPU has replaced the Intel Q9550 CPU</li><li>The additional Ethernet PCI card has been removed (the new motherboard supports an additional Ethernet port)</li></ul>	X1054148

### Notes!

1. Tests show that performance levels of the new motherboard and CPU are identical or 5-10% better than those of the obsolete board and CPU.
2. The hardware changes were made due to end of life of the obsolete components.
3. The Xorcom Rapid Recovery images that were generated from the now obsolete DG41VW board-based XE3000 appliances cannot be restored on the new S1200KP board-based XE3000 appliances. Instead, use the following factory default images:
  - XR3-RAID-S1200-SB15-2012-Mar-25
  - TW-XR23-RAID-Universal-SB15-2012-Mar-25
