

Enterprise-grade VoIP phone systems providing flexibility, modularity, and no per user license fees

Mobile communications are a necessity for consultants who are frequently on the move, meeting with clients, partners, and outsource providers. Time-based consulting fees require accurate tracking of business operations. Client satisfaction is greatly impacted by consultant availability and productivity. The unique requirements of consultancies can only be met by a flexible, reliable communications solution.

Ease of Use and Cost Reduction

CompletePBX for Consultants is an integrated voice, video, and data communications solution designed to support the needs of high-paced consulting firms. Each consultant and team leader has access to an intuitive web interface to manage their communications in real-time. The web-configurable interface enables system administrators to rapidly add services, users, and sites in support of changing projects or new office configurations.

Data services can include Internet connectivity, site-to-site VPNs, and even email/Web hosting. CompletePBX for Consultants offers consulting firms enhanced capabilities, single vendor simplicity, and cost savings.

CompletePBX for Consultants provides numerous features including:

- Customized inbound call routing for fast and efficient call processing
- Cell phone and smart phone integration
- Powerful FindMe/FollowMe services
- Interconnection of various offices to provide seamless desk-to-desk dialing
- Extensive call reporting
- Call monitoring and recording
- Voicemail and Fax-to-email (unified messaging)
- Redundancy through Xorcom's TwinStar™ hot failover capability to maximize business continuity

Xorcom CompletePBX Software

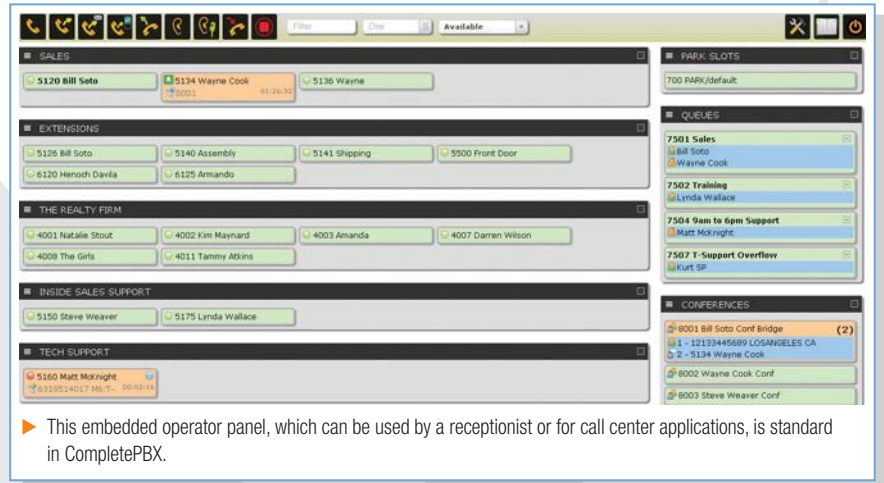

Increase your organization's efficiency, productivity, and profits.

CompletePBX means seamless integration

- Reduce upgrade costs by using existing IP telephones or SIP (Session Initiation Protocol) clients.
- Easily integrate third party products via the open application programmable interface.

CompletePBX is based on open source software

- The only commercially-supported open PBX that provides root access to certified dealers and end users for total local control of the telephony system.
- Xorcom has stabilized the software and upgrade process and is the sole source for support, maintenance, and upgrades.
- An embedded operator panel, which can be used by a receptionist or for call center applications, is standard.
- Enhanced CDR (Call Detailed Records) and call center reporting software is available at a flat rate.

CompletePBX supports the TwinStar hot failover solution

- Xorcom's TwinStar is the world's most cost-effective full redundancy solution for IP PBXs, ensuring maximum business continuity.

All CompletePBX systems come with a wide array of standard features including:

- Unlimited Extensions, Voicemail Boxes, Hunt Groups, Call Center Groups, and Auto Attendants/IVRs
- Voicemail and Fax-to-email
- Call Recording
- Call Barge and Whisper
- Find Me/Follow Me
- Free Softphone Integration
- Free Smart Phone Integration

Xorcom CompletePBX is a reliable, flexible, cost-effective communications solution that provides a customized user experience for each role in the organization.

Xorcom CompletePBX is distributed only through the Xorcom Certified Dealer channel by partners who are experienced in IP telephony implementations and who have completed the Xorcom certified training course.
