

Enterprise-grade VoIP phone systems providing flexibility, modularity, and no per user license fees

As technology advances, medical professionals are faced with the need to comply with federal electronic regulations and increasingly complex communications requirements while contending with outdated PBX systems. Voice, video, and data services are basic to performing healthcare functions such as telehealth and supporting mobility for health care staff, as well as ensuring HIPAA compliance. At the same time, given the economic reality of shrinking healthcare budgets, smart infrastructure investment decisions are critical.

Cost Reduction and Ease of Use

CompletePBX for Healthcare by Xorcom introduces a cost-efficient solution to transitioning legacy PBXs to an IP PBX that provides all the benefits of combined voice, data, and video services. CompletePBX is installed on premise giving complete control and flexibility in-house. The system integrates a broad range of endpoints so that existing equipment can be used while new devices, such as smart phones and tablets, can be added. Multiple locations, home-based offices, and remote staff are seamlessly connected through efficient call processing and routing.

CompletePBX for Healthcare provides numerous features including:

- Customized inbound call routing for fast and efficient call processing
- Desk-to-desk dialing
- Powerful Find Me/Follow Me services
- Extensive call reporting
- Call monitoring and recording
- Voicemail and Fax-to-email (unified messaging)
- Integrated multi-point video conferencing
- Redundancy through Xorcom's TwinStar™ hot failover capability to maximize business continuity

Xorcom CompletePBX Software

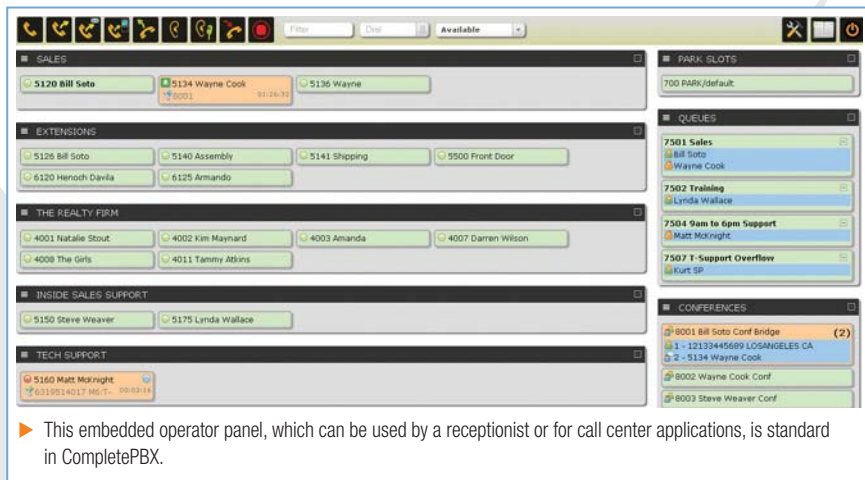

Increase your organization's efficiency, productivity, and profits.

CompletePBX means seamless integration

- Reduce upgrade costs by using existing IP telephones or SIP (Session Initiation Protocol) clients.
- Easily integrate third party products via the open application programmable interface.

CompletePBX is based on open source software

- The only commercially-supported open PBX that provides root access to certified dealers and end users for total local control of the telephony system.
- Xorcom has stabilized the software and upgrade process and is the sole source for support, maintenance, and upgrades.
- An embedded operator panel, which can be used by a receptionist or for call center applications, is standard.
- Enhanced CDR (Call Detailed Records) and call center reporting software is available at a flat rate.

CompletePBX supports the TwinStar hot failover solution

- Xorcom's TwinStar is the world's most cost-effective full redundancy solution for IP PBXs, ensuring maximum business continuity.

All CompletePBX systems come with a wide array of standard features including:

- Unlimited Extensions, Voicemail Boxes, Hunt Groups, Call Center Groups, and Auto Attendants/IVRs
- Voicemail and Fax-to-email
- Call Recording
- Call Barge and Whisper
- Find Me/Follow Me
- Free Softphone Integration
- Free Smart Phone Integration

Xorcom CompletePBX is a reliable, flexible, cost-effective communications solution that provides a customized user experience for each role in the organization.

Xorcom CompletePBX is distributed only through the Xorcom Certified Dealer channel by partners who are experienced in IP telephony implementations and who have completed the Xorcom certified training course.
