

Enterprise-grade VoIP phone systems providing flexibility, modularity, and no per user license fees

Managers in the manufacturing world increasingly recognize the costs savings and enhanced communications benefits afforded by transitioning to IP communications. CompletePBX by Xorcom is an on-premise communications solution that combines the most innovative voice applications with rich IP PBX capabilities in an open, standards-based architecture. Deploying CompletePBX can complement or replace existing telecom equipment and services, and streamline operations.

Ease of Use and Cost Reduction

Unlike proprietary systems, CompletePBX for Manufacturers eliminates the need for layers of support and per extension license and maintenance fees. CompletePBX simplifies communications management and reduces costs by converging voice and data services over a single channel.

CompletePBX for Manufacturers supports the following features:

- Customized inbound call routing for fast and efficient call processing
- Cell phone and smart phone integration
- Integration with wireless phones such as Spectralink™
- Interconnection of various offices to provide seamless desk-to-desk dialing
- Extensive call reporting
- Call monitoring and recording
- Voicemail and Fax-to-email (unified messaging)
- Redundancy through Xorcom's TwinStar™ hot failover capability to maximize business continuity

Xorcom CompletePBX Software

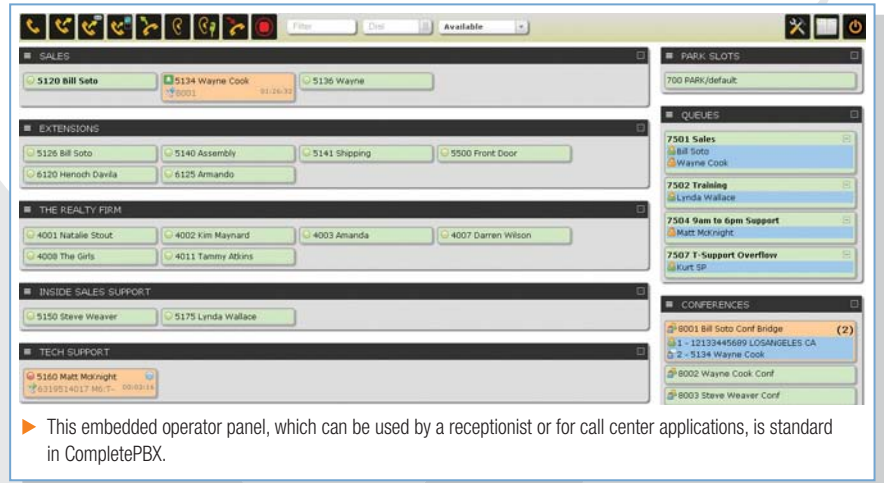

Increase your organization's efficiency, productivity, and profits.

CompletePBX means seamless integration

- Reduce upgrade costs by using existing IP telephones or SIP (Session Initiation Protocol) clients.
- Easily integrate third party products via the open application programmable interface.

CompletePBX is based on open source software

- The only commercially-supported open PBX that provides root access to certified dealers and end users for total local control of the telephony system.
- Xorcom has stabilized the software and upgrade process and is the sole source for support, maintenance, and upgrades.
- An embedded operator panel, which can be used by a receptionist or for call center applications, is standard.
- Enhanced CDR (Call Detailed Records) and call center reporting software is available at a flat rate.

CompletePBX supports the TwinStar hot failover solution

- Xorcom's TwinStar is the world's most cost-effective full redundancy solution for IP PBXs, ensuring maximum business continuity.

All CompletePBX systems come with a wide array of standard features including:

- Unlimited Extensions, Voicemail Boxes, Hunt Groups, Call Center Groups, and Auto Attendants/IVRs
- Voicemail and Fax-to-email
- Call Recording
- Call Barge and Whisper
- Find Me/Follow Me
- Free Softphone Integration
- Free Smart Phone Integration

Xorcom CompletePBX is a reliable, flexible, cost-effective communications solution that provides a customized user experience for each role in the organization.

Xorcom CompletePBX is distributed only through the Xorcom Certified Dealer channel by partners who are experienced in IP telephony implementations and who have completed the Xorcom certified training course.
