Products

Eight product lines in the Xorcom IP-PBX family support from 2-1500 extensions, addressing the needs of SMB as well as enterprise. The flagship product, CompletePBX, is a **fully integrated business telephony solution** that provides excellent user experience, a robust feature set, unparalleled security via a built-in session border controller and the cost-effectiveness of VoIP, with no per user license fees!

Xorcom IP-PBX with Xorcom IP phones provides an "end-to-end" solution for corporate communications.

TwinStar Plus, Xorcom's award-winning **high availability solution**, is a sophisticated automatic replication and fault detection mechanism that optimizes system uptime. It is ideal for pure IP environments, as well as those supporting analog and digital phone lines.

Carriers and customers alike will appreciate the ability of CompleteSBC, a built-in software-based **Session Border Controller (SBC)** that effectively seals off the IPPBX, to protect and defend the CompletePBX IP-PBX from misuse. A sophisticated set of pre-defined yet customizable rules, supported by an intuitive GUI interface, enables easy configuration of its many features.

Xorcom also provides a **Property Management System (PMS) interface** bundled with a Xorcom IP-PBX for the hospitality market. It upgrades phone systems to a cost-effective VoIP solution while leveraging existing infrastructure in the form of analog phones and CAT5 cabling.

Distribution Partners

Xorcom sells its products via a worldwide channel of professional partners. Criteria for becoming an authorized Xorcom distribution partner include:

- maintaining stock enabling quick and efficient supply of customer orders
- employing technical support engineers, certified bi-annually by Xorcom, in order to provide first level support to customers
- marketing activities, e.g., channel education and representation of Xorcom locally
